Dear Friends ,

Please do find underneath our appreciation :

«All human beings long for happiness .

All human beings have the same feeling .

They express it under varied ways ,under varied formes ,as rites ,ceremonies ,words .These manifestations ,they call "religions" depend on the climate they were borne ,depend on the shape of their brain ,of their ethnic background .

Buddhism does not call on a God to explain the world .

People who are truly religious are above discriminations .

All the external demonstrations are merely decorative ,with the purpose of reaching the level of big masses .

We have also to note that very often religions was used as means of domination .

An earnest study of Psychology would demonstrate that what people call religion is but a feeling ,a qualitat inherent to Nature ,a vital pulgion which gives indefinitely re-birth to new lifes ,until Nature is able to developp a CONSCIOUSNESS allowing it to see in the true essence of everythings and to master it .

If people could understand the true nature of things they would understand that all have a common essence ,in a cosmic ONENNESS .

In order to stand above all discrminations ,it is necessary

to go beyond words ,to red off words ,to practice an inner silence,
That is the Way to understand by intuition and practice what is
LIFE ,to get PEACE in oneself and with others ;therewith to be
tolerant and happy . "

I hope that your International Press Conference for Religious
Peace will be successful .

Sincerely

Yours
